Its time for a Math notebook check! Once your notebook is ready, bring it up to the front.

You'll have some seatwork on exponents to do while you are waiting to get your notebook back.

Standard: 6.EE.5

Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true.

You will need your notebook. Open it to the next available page to start taking notes!

Solving One Step Equations

An equation is a mathematical sentence that contains the = symbol. This symbol is between two expressions or numbers.

"HE SOLVED HIS FIRST EQUATION TODAY."

$$\frac{x}{7} = 3$$
$$(7)\frac{x}{7} = 3(7)$$
$$x = 21$$

"I'm going to need tech support."

Important to remember!
Write it down...NOW

$$2 + 2 = 4$$
$$4 \times 2 = 7 + 1$$
$$5 \times 3 = 15$$
$$10 - 1 = 9$$
$$3 - 2 = 5 - 4$$

Its like a see-saw, you have to keep it in balance

Whatever is on the left side of the equation must equal the **SAME AMOUNT** as whatever is on the right side of the equation.

The Golden Rule of Algebra

Do unto one side what you do to the other.

Solve

$$x - 7 = 6$$

To solve you must get x alone on the left side of the equal sign

$$x - 7 = 6 \quad \leftarrow \text{write the problem}$$

$$+7 = +7 \quad \leftarrow 7 \text{ is the opposite of } -7, \text{ so add } -7 \text{ to both sides}$$

$$x + 0 = 13$$

$$x = 13 \quad \leftarrow x \text{ is now alone}$$

NOTICE: in each line, both sides are always equal
and equal signs are lined up

Practice Problems--Write the problem--The answer here is not important--the objective is to use correct algebraic form.

1. $a + 8 = -4$

2. $4 = x + 2$

3. $c - 9 = 3$

4. $6 = 5 + x$

5. $b - 10 = 8$

6. $7 + x = 5$

7. $t + 6 = -4$

8. $9 = 10 + x$

9. $4 + n = 4$

10. $x - 8 = -8$

11. $-12 + p = 18$

12. $5 = 9 + z$

13. $6 + x = -4$

14. $f - 8 = -3$

15. $5 + x = -1$

16. $n - 2 = 9$

17. $3 = x + 5$

18. $x - 8 = 4$

19. $5 + x = 10$

20. $7 = 1 + d$

21. $-4 + a = -4$

22. $x - 9 = -2$

23. $-7 + n = -5$

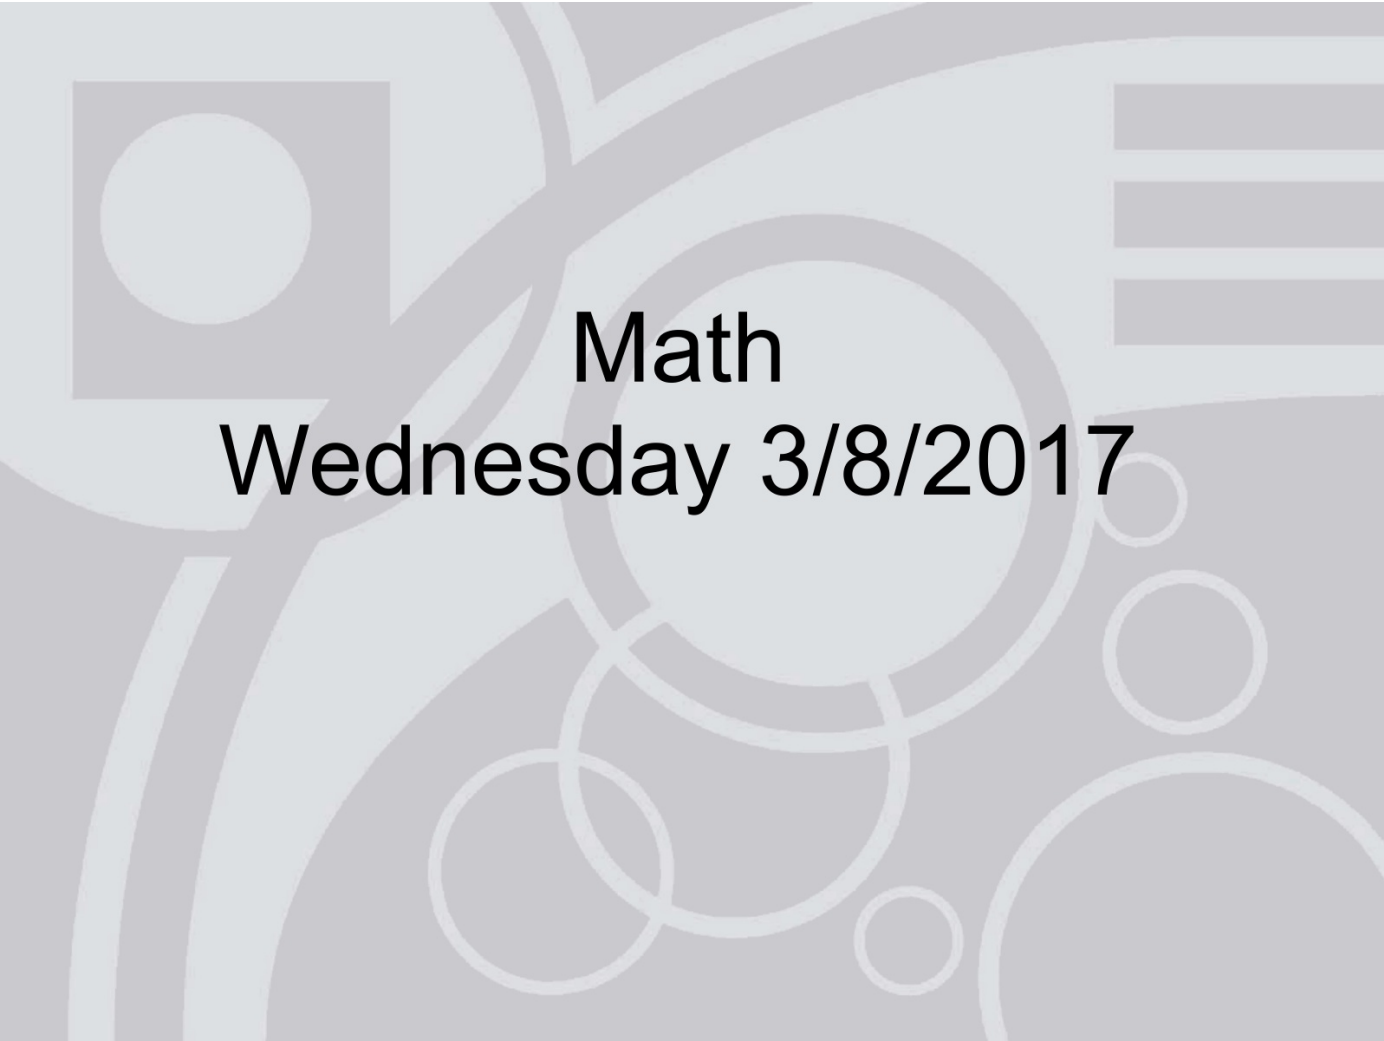

24. $15 + t = 10$

25. $x - 9 = -8$

26. $x - 3\frac{1}{4} = 6\frac{1}{2}$

27. $-4\frac{1}{3} + x = 3\frac{2}{9}$

28. $4\frac{2}{5} + p = 7\frac{9}{10}$

Today, we are going to continue to practice working with equations.

Infinite Algebra 1

Name _____

One-Step Equations

Date _____ Period ____

Solve each equation.

1) $26 = 8 + v$

2) $3 + p = 8$

3) $15 + b = 23$

4) $-15 + n = -9$

5) $m + 4 = -12$

6) $x - 7 = 13$

7) $m - 9 = -13$

8) $p - 6 = -5$

7) $m - 9 = -13$

8) $p - 6 = -5$

9) $v - 15 = -27$

10) $n + 16 = 9$

11) $-104 = 8x$

12) $14b = -56$

13) $-6 = \frac{b}{18}$

14) $10n = 40$

$$15) \frac{v}{8} = 2$$

$$16) 16 = \frac{k}{11}$$

$$17) -15x = 0$$

$$18) -17x = -204$$

$$19) 21 = -7n$$

$$20) \frac{m}{4} = -13$$

$$21) -126 = 14k$$

$$22) -143 = -11x$$

$$23) -16 + x = -15$$

$$24) -5 = \frac{a}{18}$$

127

23) $-16 + x = -15$

25) $-17 = x - 15$

27) $\frac{v}{7} = 8$

29) $-7 + m = 8$

128

24) $-5 = \frac{a}{18}$

26) $n - 8 = -10$

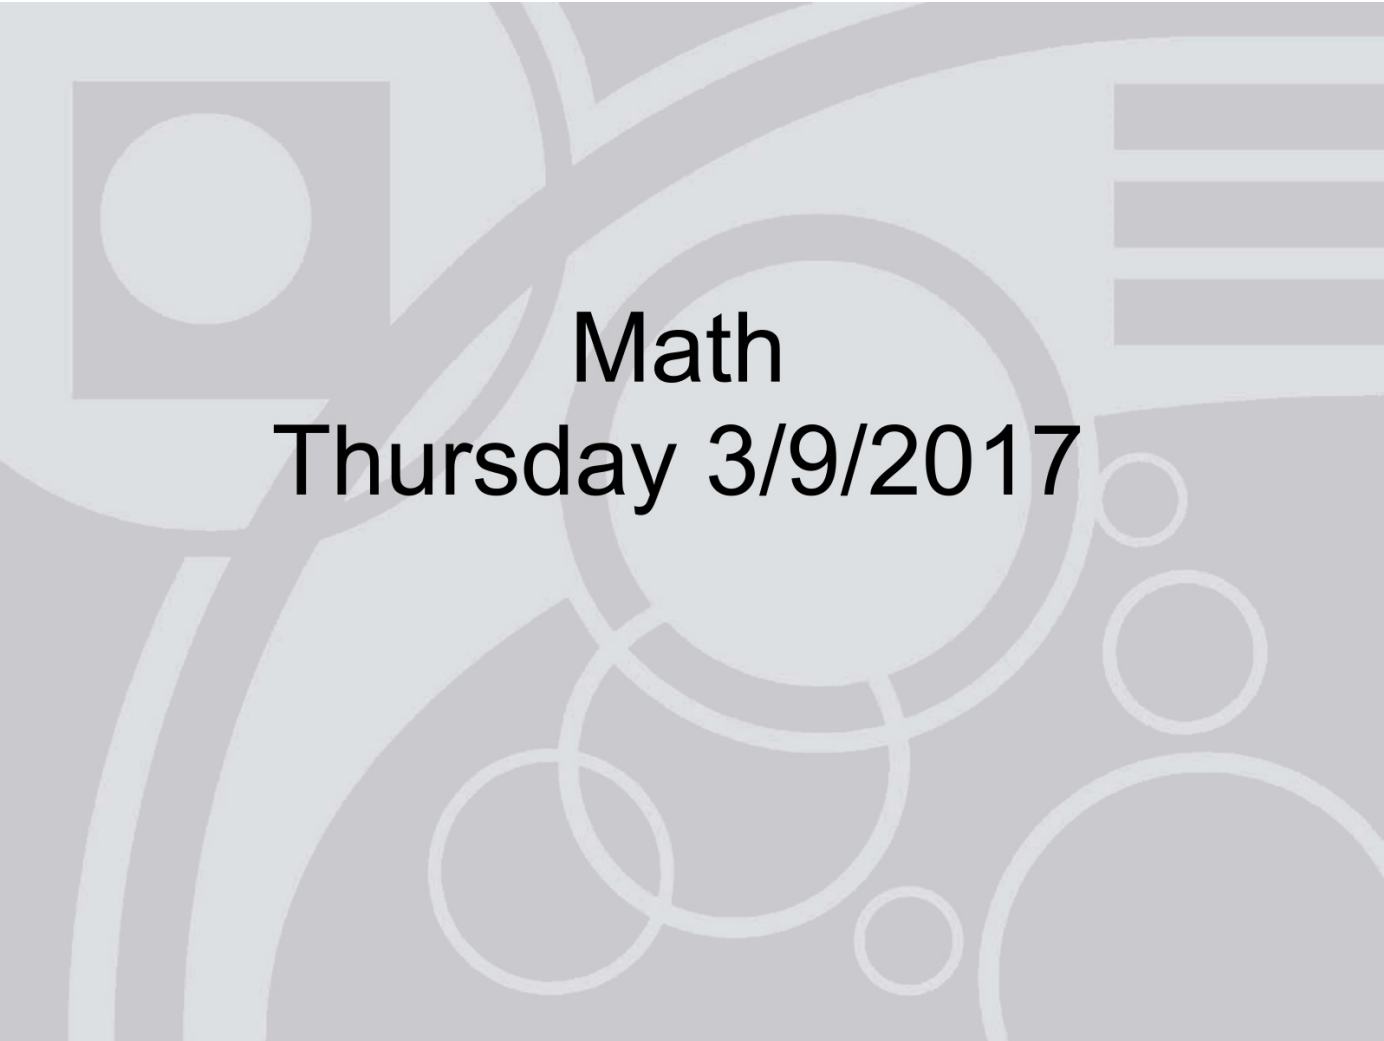

28) $a + 11 = 20$

30) $18 + m = 8$

One Step Equations

Equation: An equation is a number sentence.

Examples: $n + 5 = 12$ y quarters = \$4

Variable: A variable is a letter that replaces a number.

Examples: $n + 5 = 12$ y quarters = \$4

When you have a one step equation, ask yourself these 2 questions:

1. What is the equation asking?
2. What do I need to know to find the answer?

Example:

$$\$4 = y \text{ quarters}$$

1. What is the equation asking?

How many quarters are in \$4

2. What do I need to know to find the answer?

How many quarters are in one dollar

One Step Equations - Background for Money

Number of quarters in one dollar:

Number of dimes in a dollar:

Number of nickels in a dollar:

Number of pennies in a dollar:

Drag the answers out of the box & place them in the correct rectangle.

One Step Equations - Background for Time

Number of months in a year:

Number of weeks in a year:

Number of days in a year:

Drag the answers out of the box & place them in the correct rectangle.

Number of days in a month:

Number of days in a week:

Number of hours in a day:

Number of minutes in an hour
& seconds in a minute:

Fishing for One Step Money Equations

Game board area with a blue sky background, white clouds, and a yellow sun. Below the sky is a dark blue horizontal band with eight rectangular cutouts. Underneath is a large yellow area representing the ground, containing two rows of yellow rectangular cutouts. At the bottom center is a wooden treasure chest with a metal padlock and a key. To the right of the chest is a red die with white pips. In the bottom left corner is a scorekeeping table.
